

OSE European

Reduce your carbon footprint with OSE's 'green' transport initiatives

OSE can help to reduce your carbon footprint with our 'green' transport initiatives.

Through our Approved Partner Network, we have vehicles located all over Europe which enables us to react quickly and accurately to any transport request, as well as significantly reducing the number of empty miles travelled.

In addition, through our Partner Network, we are aware of empty vehicles located around Europe looking to reload, therefore reducing the number of empty vehicles and easing traffic congestion and reducing pollution.

This not only reduces costs but also helps to improve corporate social responsibility and reduce carbon emissions.

We provide a full range of transport services including UK Sameday, UK and European Dedicated Express and Economy European Freight.

For more information about our green transport initiatives and full range of transport and logistics services visit our website at www.oseeuro.com.
